Production Guide 1997/98

From Signal Hill to the South Shore, when planning your next shoot in Atlantic Canada, start with **P.S. Atlantic.**

Why?

We've been there. From Charlottetown and Moncton, to St. John's and Yarmouth, for 10 years **P.S. Atlantic** has been here, and there, pretty well everywhere in Atlantic Canada supplying the best in cameras, lighting and grip, and generators. Shooting in Corner Brook, Fredericton, Sydney or Summerside? We'll be there.

And here.
Everywhere and anywhere you want to go.
Even Halifax.

NOVA SCOTIA FILM DEVELOPMENT CORPORATION

The Nova Scotia Film Development Corporation (NSFDC) is pleased to present the tenth edition of the Nova Scotia Film and Video Production Guide. This book contains essential resource information and comprehensive listings of companies and individuals involved in the industry.

The Guide is divided into sections: Filming in Nova Scotia, an overview of useful information about Nova Scotia; Personnel listings by profession; Producers; Production Companies; Production Services; and Support/Resource Service listings. For quick reference the index includes telephone numbers for all Personnel listings; there is also a separate index for all Advertisers in the Guide. If your listing is eligible, but not included, please check for the detachable listing request at the back of the guide.

The Nova Scotia Film Development Corporation was established in 1990 to stimulate investment, employment and growth in the film and video industry in the province, while facilitating recognition of Nova Scotia's locations, skills and creativity. The Corporation is a member of the Association of Film Commissioners International (AFCI) and as such, provides a wide range of services for producers looking to shoot in the province.

Production inquiries or requests for additional copies of the Guide should be directed to the Director, Marketing at NSFDC

History
Plentiful fish and furs lured the English and French to battle over the New World. In Nova Scotia, restorations and re-creations reflect this colourful history. See *Museums.*

The Habitation at Port Royal, built for explorer Samuel de Champlain in the 1600s, was the earliest European colony north of Florida. Reconstruction of the French fur trading post was true to the techniques used in 17th century France. Throughout the buildings, the framework has been mortised, tenoned and pegged together.

Louisbourg, a massive stone town and fortress, contains over 50 buildings restored to their original condition. Over 200 years ago it was the largest French fortress and naval base in North America. Today it is the largest historical reconstruction in Canada. The homes, storehouses, inns, cabarets and the King's Bastion re-create the 18th century.

Halifax was founded in 1749 to establish British strength in the North Atlantic and the city retains a flavour of the past. Modern office and apartment towers are a striking contrast to old stone and wooden buildings. Georgian mansions, Victorian government buildings and High Street row housing evoke England and Scotland of the past and present. The impressive fortifications of the Halifax Citadel are situated on a hill overlooking the heart of the city. The twin cities of Halifax and Dartmouth, located on opposite sides of the second largest natural harbour in the world, are linked by two bridges and passenger ferries.

Historical restorations of early North America abound. New England Planters and Loyalists built houses similar to the colonial homes of the northeastern United States, from saltbox to Georgian brick. Sherbrooke Village is a restored lumbering town of the 1800s with a working water-powered sawmill and 25 buildings on their original sites. Coal miners in 1850 would have lived in a company town like the Glace Bay Miners' Village in Cape Breton.

Nova Scotia has over 50 museums, restored inside and out, as well as converted sites still in commercial, residential and recreational use, such as Historic Properties in Halifax (renovated dockside warehouses of the 1800s) or Lunenburg's elementary school (an ornate Victorian woodframe). Aerospace and defence industries compete with petroleum for prominence.

Topography
Bodies of water almost surround Nova Scotia where the coastline stretches for 7400 kms. The indented coast defines the look and feel of the province. The warm Northumberland Strait borders green farmland, interspersed with sandy beaches — or ice floes in late winter. In the Bay of Fundy the world's highest tides slip past sandstone bluffs and basalt rock formations, temporarily stranding boats on red mud flats. By times, the Atlantic Ocean laps at the shores of protected inlets or smashes against the granite boulders that jut into the sea. Northern Nova Scotian shores are subject to pack ice and occasional icebergs in the early spring.

NOVA SCOTIA

Nova Scotia's landforms have been ground and polished by wind, water and ice. Prehistoric volcanoes are now rounded highland peaks etched with highways (Cape Breton, Antigonish, Wentworth). Basalt flows underlying the North Mountain ridge protect the lush fruit-growing and farming region of the Annapolis Valley from the Bay of Fundy winds.

Ice Age glaciers carved deep harbours and left the province dotted with lakes. Granite boulders, the debris left by the receding glaciers, are strewn about an eerie moonscape setting around Indian Harbour, Peggy's Cove and West Dover. From dense stands of forest to lush agricultural valleys to scrubby coastal areas, the vegetation is enchantingly varied. Brilliant foliage colours the landscape in September and October.

Climate

Weather service phone numbers are listed under *Weather/Tides/Road Reports.*

The proximity of the Atlantic Ocean has a moderating effect on Nova Scotia's climate.

Wintertime temperatures rarely fall to extreme low values except in the presence of a rapid influx of Arctic air. Measurable accumulation of snow begins in late December and may last until April, although snow is not always on the ground through the winter season. Spring is chilly and damp due to southerly winds while sea fogs can persist into early summer. Summertime maximum temperatures are comfortable. Air flows off the warmer parts of the continent make late summer and early autumn generally the best for outdoor activities. During this season, spent hurricanes from the Caribbean can churn up the coastline, causing spectacular seas and high winds.

Fresh and salt water temperatures are most suitable for swimming from the end of June to mid-September.

Temperature variations and snowfall accumulations are greater in inland areas.

Air

Nova Scotia is connected to the rest of North America and to Europe by major airlines. Air Canada provides daily flights from New York, Boston, Toronto, Montreal and St. John's, with worldwide connections. Canadian Airlines provides daily flights from most Canadian cities and from Boston, with connections within Atlantic Canada and worldwide. Nova Scotia is well serviced with scheduled flights from continental Europe, the UK, Scandinavia and Iceland.

There are three regularly serviced major airports in the province: Halifax, Sydney and Yarmouth. Other smaller airports (some seasonal) and airline phone numbers are listed in the Guide. See *Airports.*

Ferry Service

Yarmouth, Nova Scotia is connected by ferry to Bar Harbor and Portland, Maine. (May to October). The ferry from Saint John, New Brunswick provides convenient year-round access to the Annapolis Valley through Digby. Prince Edward Island is connected by ferry from Caribou (May to December). The ferry from Newfoundland arrives in North Sydney. Many small islands and shortcuts are serviced by small car and walk-on ferries. Halifax and Dartmouth are connected by two passenger ferries.

Highways

Nova Scotia has a network of well-maintained highways connecting the major centres. Most major highways have posted speed limits of 100 km/h (62 mph).

Driving time from the Maine/New Brunswick border to Nova Scotia (distance of 197 miles) is about four hours.

Shipping

Nova Scotia is ideally positioned to take advantage of the trans-Atlantic trade routes. It is both a primary east coast port of entry and a base for feeder lines serving Canadian and American ports. Cruise ships call at Nova Scotian ports in the summer months.

Waterfront industries include petroleum refining, shipbuilding and repair, Coast Guard and Canadian Forces (navy and air force) bases, an automotive shipping terminal, Bedford Institute of Oceanography, fish processing, diving operations, yacht marinas, sport fishing and whale watching.

Train

Passenger and freight services link Halifax to Montreal via Truro and Amherst. The CN terminal that ends at the Port of Halifax includes grain elevators and bulk cargo facilities.

PROJECT FUNDING

Nova Scotia Film Development Corporation
The Nova Scotia Film Development Corporation (NSFDC) was established in 1990. The NSFDC's mission is to stimulate investment, employment and growth in the film and video industry in the province, while facilitating recognition of Nova Scotia's locations, skills and creativity.

Nova Scotian producers may apply for development loans, equity investment and special project grants. To qualifying projects, a refundable tax credit is also available.

Programming:

- Equity investment of up to 1/3 of expenditures in Nova Scotia, to a maximum of $200,000 is available to qualifying productions.
- Loans are available to support script and project development, for up to 1/3 of approved costs to a maximum of $25,000 per project.
- Special project grants of up to $6,000 are available for emerging producers.

A tax credit of up to 30% of all eligible Nova Scotia labour expenditures, to a maximum of 15% of the total eligible budget is administered by the NSFDC. Co-productions may access the refundable credit subject to Nova Scotia ownership, investment and control of the project.

CIDA - Canadian International Development Agency
Development Information Program

The Development Information Program encourages public understanding and awareness of international development issues and stresses the importance of Canada's involvement in the developing world. The Program provides financial support for the communications initiatives and activities of partner organizations whose focus is the Canadian domestic market.

PROJECT FUNDING

Types of initiatives supported range from i) broadcasts to films, videos and exhibits, to ii) co-publications involving mainly print and electronic products, to iii) co-operative programs with media to enhance media understanding and encourage more in-depth coverage of international development issues.

Multiple-media and multiple-partner projects are encouraged as an efficient way to reinforce messages and build partnerships.

Co-Productions: for broadcasters, filmmakers, video producers, performers and exhibitors. The program will fund radio and TV broadcast initiatives (including co-productions), exhibitions, films, videos and theatre. Proposals may focus on the research and development for a project, or upon production.

Guidelines available by calling (819) 997-1663 or through the Internet at http://www.acdi-cida.gc.ca

PROJECT FUNDING

The Harold Greenberg Fund (The FUND)
The FUND is a non-profit organization, established in 1986 by TMN-The Movie Network, an Astral Communications Inc. company, to foster the creation and development of dramatic feature films suitable for Pay TV.

Canadian writers and producers are eligible for interest-free loans from The FUND's Script Development Program in three different categories: i) Treatment to First Draft, ii) Second Draft, and iii) Final Draft. There is also a Senior Projects Program available. All FUND loans are to be repaid on the first day of principal photography.

In 1991, The FUND, through Viewer's Choice Canada, inaugurated an Equity Investment Program for Canadian feature movies. The FUND may invest in theatrical and made for pay movies which are made available for telecasting on Viewer's Choice Canada, the Eastern Canadian pay-per-view service.

Guidelines and details for programs are available from The FUND. Chairperson: MacKeigan, Wendy

REGULATIONS: CANADA CUSTOMS

Goods Entering Canada Temporarily

Goods entering Canada temporarily are subject to full duties and/or taxes unless there is a regulation or legislation which permits the duties/taxes to be reduced or removed. Regulations exist currently which cover various temporary entry situations. Customs should be contacted prior to importation in the event there have been legislative changes.

A. Temporary Importation Regulations

Customs Memorandum D8-1-1 (The Temporary Importation Regulations) contains various items which may be imported temporarily if the specific conditions of the item are met. Several items in D8-1-1 require prior approval as they may have a "non-availability in Canada" condition, while others stipulate that the goods may only be imported by "non-residents."

Items are divided into Class 1 and Class 2 items. Class 1 items are documented on form E29B, Temporary Admission Permit. While the duty is removed on Class 1 items, a security deposit may be required to be paid. This security deposit, which can equal the duties and taxes, will be returned when the goods are exported. Some Class 1 examples are: photographic, cinematographic, video and sound recording equipment for the production of cultural, educational or entertainment programs, travelogues of benefit to the Canadian travel industry, or coverage of news or sports events.

REGULATIONS: CANADA CUSTOMS

Entry of Class 2 goods is documented on form B3. The duty is reduced on Class 2 items. Rather than being payable on the full value of the goods, duty (at the applicable rate for the goods) is payable on 1/60th of the value for each month the goods remain in Canada. Under Class 2, there is a minimum duty payment of $25. Not all Class 2 items permit a similar proportionate payment of the Goods and Services Tax (GST). If there is no provision for 1/60th GST, it will be collected on the value for tax (full value of the goods plus duty.) Some Class 2 examples are: equipment to film television series, feature films or films of an educational nature for international distribution.

One of the main conditions associated with temporary entry under these regulations is that the goods must be exported (or permanently entered) at the end of the temporary period. Proof of export must be provided to Customs when the goods leave Canada. If goods are being hand carried out of Canada, the temporary importer must report to Canadian Customs officials at the point of exit with the goods. At that time, a Customs officer will identify the goods and certify export. If the goods are exported by commercial carrier, a copy of the commercial shipping document (which clearly describes the goods) may be returned to the port of entry as proof of export. Failure to provide proof of export will result in a request for payment of full duties and taxes.

For types of productions not listed above (e.g., commercials), or for further information or assistance on these regulations, please call:

Atlantic Regional Remissions Officer	(902) 426-2665

For information on rates of duty, please call:

Customs Appraisal Unit	(902) 426-7982

B. Goods imported on a temporary basis from Mexico or the United States
Customs Memorandum D8-1-14 covers specified goods imported on a temporary basis from Mexico or the United States. While these goods may temporarily enter Canada duty free, a security deposit may be required to be paid. There is no relief from payment of the Goods and Services Tax.

Tariff item 9823.10.00 covers professional equipment necessary for carrying out the business activity, trade or profession of a business person who qualifies for temporary entry pursuant to Chapter 16 of the *North American Free Trade Agreement.*

Tariff item 9823.20.00 covers equipment for the press.

Tariff item 9823.30.00 covers equipment for sound or television broadcasting.

Tariff item 9823.40.00 covers cinematographic equipment.

Tariff item 9823.50.00 covers goods for sports purposes.

REGULATIONS: CANADA CUSTOMS

Any questions on these regulations should be directed to:
The Remissions Officer (902) 426-2665

C. Raw Film Stock
Duty and taxes will be charged on raw film stock entering Canada. Documentation will be on a B3 form. A production company may be able to obtain a drawback (refund) of duty and taxes (except the GST) paid if they submit a drawback claim form (K32) together with proof of export (of exposed and unexposed film stock) when the film stock leaves Canada. Export can be certified by Canadian Customs officials on form E15 at the point of exit.

For further information please contact:
Duties Relief Administrator (902) 426-7982

It is advisable to allow ample time for all of the above. A customs broker can be helpful. See *Customs Brokers.*

REGULATIONS: HUMAN RESOURCES - CITIZENSHIP AND IMMIGRATION

It is the policy of the Government of Canada that only Canadian citizens and permanent residents have a right to work in Canada. All others must seek and obtain lawful permission to work in Canada from Citizenship and Immigration Canada.

Persons who have obtained employment authorizations from Citizenship and Immigration Canada are also entitled to work in Canada. These authorizations are issued at Canadian Consular offices abroad and, in the case of nationals or residents of the US, Greenland and St. Pierre and Miquelon, at Canadian ports of entry. Human Resources Development Canada is responsible for validating that Canadian citizens or residents will not be adversely affected by permitting foreign workers to fill available positions.

Procedures for Obtaining Employment Authorization(s)
Since Human Resources Development conducts the validation process, film and television producers (employers) who wish to bring foreign workers to work in Canada must contact the Human Resources Centre closest to the location of the production. To ensure expeditious processing of an employment validation, the employer will be required to provide the following information:

- employer's name, address, and telephone and fax numbers
- name, address, telephone and fax numbers of employer's Canadian representative (if appropriate)
- a brief description of the film or production
- the number of foreign workers requested and their job titles and a brief description of the duties highlighting any special skill requirements

REGULATIONS: HUMAN RESOURCES - CITIZENSHIP AND IMMIGRATION

- the number of Canadian workers to be hired, by occupation
- the duration of stay, with expected dates, in Canada
- the filming/ production location(s)
- the foreign worker's: (a) full legal name, (b) permanent address abroad, (c) citizenship, (d) occupation, (e) birth date, (f) port of entry, and (g) date he/she will be entering Canada

Initially, a four-week lead time is necessary to permit adequate consultations between Human Resources Development staff, Immigration officials, the film and television producers (employers), and, if applicable, union and guild representatives. The purpose of these consultations is to determine the availability of qualified Canadian workers to fill jobs for which foreign workers are being requested. This is necessary to ensure that job and career opportunities for Canadians will not be adversely affected by the entry of the foreign worker(s).

When a positive decision is made, the responsible Human Resources Centre will validate the offer of employment and notify the appropriate Consular or port of entry office. The employer will advise the foreign worker(s) to contact the appropriate Canadian Consulate or port of entry where the worker(s) will be advised of any further steps necessary for the issuance of employment authorization(s).
There is a processing fee of $150 (payable in Canadian funds) for each employment authorization.

REGULATIONS: PERMITS

Filming Permits
Filming permits are not required, except in the case of federal, provincial or municipal park or museum sites.

Airports
Production companies wishing to film at **airport locations** must make a written request outlining the desired locations, dates, times, etc. to the appropriate federal authority. See *Airports.*

Marketing and Property Management, Transport Canada	(902) 873-1213.

Explosives
Special effects requiring the use of **explosives** are regulated federally by the Department of Natural Resources, under the Minerals, Metals and Explosives act and provincially by the Department of Labour under the Occupational Health and Safety Act (See *Government of Canada, Government of Nova Scotia).* Qualified F/X technicians from out of province should contact these authorities.

Parks or Museums
Production companies planning to film in a **federal** park location must get the permission of the park superintendent. See *Museums and Restored Sites.* Those seeking permission to film in a **provincial** museum site must contact the Director of Cultural Affairs, Peggy Walt (902) 424-5929.

REGULATIONS: PERMITS

Police: Off-duty
Production companies should notify the appropriate police department of their filming plans as far in advance as possible. Off-duty police officers may be hired by the productions to facilitate street filming. In Halifax contact:

TAXES: HARMONIZED SALES TAX (HST)

The 15% Harmonized Sales Tax (HST) is a value-added tax which replaces the federal 7% goods and services tax (GST) and the provincial 11% sales tax in Nova Scotia. Virtually all goods and services acquired in Nova Scotia for use in film production, other than employee payroll and basic groceries, are subject to the 15% HST.

A production company which does not normally carry on business in Canada is entitled to recover the HST or GST paid on property that is exported from Canada and on other goods and services acquired for consumption or use exclusively in the production of copyright-protected work. Storage and shipping costs are not eligible, and all copies of the work must be exported.

Application may be made by using the form General Application for Rebate (GST189). The rebate may also be assigned to suppliers so that they do not have to collect the HST. More information and a sample assignment letter are contained in the publication *Doing Business in Canada: A Guide for Non-Residents.* A rebate may also be claimed by non-resident individuals for the HST or GST they pay on short-term accommodation while in Canada, and for the personal goods they export. Details and application form are available in the pamphlet *Tax Refund for Visitors.* Original receipts must be submitted with both types of rebate claim.

A production company, whether resident or non-resident, which makes a sale (or rental or exchange) while carrying on business in Canada may be required to become a GST/HST registrant. A company which carries on business in Canada but makes no sales may still be entitled to register voluntarily. Registrants will collect tax on sales in Canada but will be able to claim tax credits on their expenses. Registrants file returns on a monthly, quarterly or annual basis and must retain adequate books and records. Because non-resident producers who make few sales in Canada may usually be in a refund position, it may be to their advantage to elect a monthly filing frequency. Production companies which do not ordinarily carry out business in Canada are not able to become GST/HST registrants but may be entitled to the tax rebate on exported goods outlined above.

TAXES: INCOME TAX (WITHHOLDING)

A production company may hire and pay income to individuals, partnerships and/or corporations in the production of a film. If the company hires non-residents for services performed in Canada in an employment or self-employed situation, the company will be required to make deductions as required by the Income Tax Act.

Non-resident employees usually have the same amount of tax deducted at source as Canadian residents. Employers must deduct and remit the tax to Revenue Canada and report the amounts on a T4 Summary and related T4 Supplementary form.

When non-resident individuals, partnerships or corporations provide services in Canada, they have to pay a 15% withholding tax on fees, commissions or other amounts they receive. The payers of these amounts have to deduct the withholding tax and send it to Revenue Canada, regardless of whether they are residents or non-residents. The payer also has to report the tax deducted on a T4A-NR Summary and related T4A-NR Supplementary form.

If a tax treaty exists between Canada and the non-resident's country of residence, it may provide some relief from Canadian tax. Under the tax treaty between Canada and the US, US residents can usually apply the income tax they paid in Canada against their taxable income reported in the US.

We accept collect calls. To register for withholding taxes or more information contact:

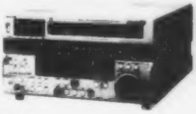
See the difference Betacam SX MPEG-2 4:2:2 P@ML makes.

Betacam SX™ is the first complete system designed around MPEG-2 4:2:2 P@ML with field-to-station transmission in 2x real-time. Only Betacam SX MPEG-2 4:2:2 P@ML technology can double your transmission capability and save transponder time and money. Whether you transmit one channel at twice real time or two channels simultaneously in real time, this algorithm is built for abuse.

And for superior picture quality, Betacam SX MPEG-2 4:2:2 P@ML compression provides the picture and detail you need to withstand the rigours of live-to-air broadcast. Review incoming feeds while you're still recording news live from the scene, even in the midst of gale force winds. Pre-select scenes in-camera before you begin editing, then shuttle through your footage at 20x real time for a high speed "picture stamp" review.



Evolve into a digital environment with Betacam SX.

When you're covering breaking news like natural disasters, speed's what you need. Betacam SX transfers tape-to-hard drive and machine-to-machine at up to 4x real time. And with existing analog Betacam™ oxide or metal tape playback compatibility, SX makes the changeover to digital hassle-free.

Get all the benefits of non-linear editing and tape.

There's never been a system like this before. Hard drive and 1/2" tape in the very same box. Now, all the benefits of non-linear editing and tape are at your fingertips...at the same time, in the same system.

The Hybrid Recorder will remind you of the tape machine you're using now, but with digital cuts and A/V split capabilities simple enough to handle from the front panel.

Add the DNE-50 Field Editor to the Hybrid Recorder for easy GUI drag and drop editing in a small, light package, and including features like timeline editing with independent control of 4 channels of audio. Instant tape archiving means there's always access to a complete copy of your original footage. That's important when Mother Nature could change her mind at any moment.

Whether you're covering or producing breaking news, Betacam SX will revolutionize your work.

OKAY.
YOU'RE CUTTING A PROJECT WITH A DIRECTOR, WRITER, ART DIRECTOR AND A CLIENT.

WITH ALL THOSE EGOS, YOU BETTER TRUST WHOEVER IS HOLDING THE KNIFE.

You have just built an eclectic team of passionate, overworked individuals with some very specific ideas. To each, it is ***their*** project and ***their*** name goes on it. And ***you've*** introduced them.

You need to trust an editor. One whose cuts will turn every head in the room. ***In one direction.*** PostPerfect is a post production facility offering four complete Avid non-linear editing suites and 3-D computer animation. Their local and national work in television commercials, corporate videos and documentaries has gained ***international*** awards and clients. Clients who consistently say that the final moments of the online were unanimous.

Sure there will be times when opinions and egos clash in a flurry of offline variations and debate. Just remember two things. We cut on Avids, and our knives are kept safely in the kitchen.

Sprung manufactures engineered stressed membrane, clear-span structures utilized by the film industry for sound stages, crew dining facilities, remote film locations, special FX set design, plus other re-locatable uses. From inventory, structures are erected in a fraction compared to conventional construction. By design, the structures shed snow and withstand high winds. Widths from 30' - 130' wide, by any length. Lease or purchase. *Darkman III, Alive, Starship Troopers*

Come to Cape Breton and Make History!

CAPE BRETON ISLAND can take you back in time. It is the site of the largest historical reconstruction in North America-The Fortress of Louisbourg. The authentic walled town has served as seventeenth and eighteenth century Europe and North America. It has even been the setting of a fairy tale. Add to this the spectacular scenery, the Atlantic Ocean coastline, incredible light, and an abundance of open spaces and Cape Breton is the perfect setting for your next period film.

During 1994, Shelburne was the production and filming base for the largest feature film ever made in Canada -- The Scarlet Letter -- based on Nathaniel Hawthorne's classic, The Scarlett Letter. The movie stars Demi Moore, Robert Duvall and Gary Oldman.

Just 200 Km from Halifax, Shelburne's American Revolution Era Loyalist waterfront depicts architecture from 1783 and offers unique location opportunities for photography, commercial, film and television production. The panoramic view of a natural forest across the harbour, the rugged coastline, versatility of space within a historic area -- combined with our ability to meet your production needs through a varied selection of local business, accommodations, office facilities and a trained work-force -- make Shelburne an exciting site for production purposes.

Lunenburg, Nova Scotia

UNESCO World Heritage Site
World-class filming location

Straddling a narrow peninsula, with shorelines on two harbours, Lunenburg's unique geography, internationally recognized architecture and streetscapes portray a long history of affluence and hard work. Founded in 1753, the homeport of the tallship Bluenose, has a proudly preserved heritage of ship building and seafaring, evident along our active waterfront. Spectacular scenery, warm hospitality, a full range of dining and accommodation facilities, a temperate climate and world-class summer festivals support a thriving tourism industry.

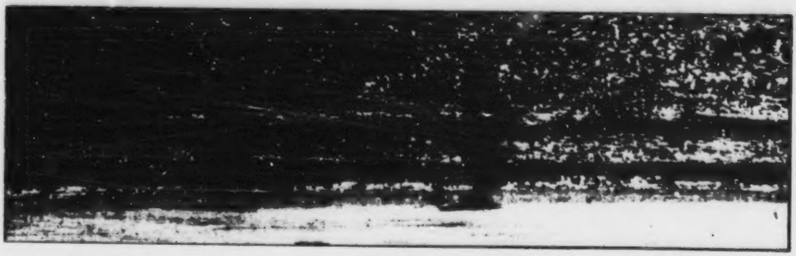
The South Shore's Great Outdoors!



Clam digging at Beach Meadows Beach, By Ron Hrushowy

Queens County.....

Located just 90 minutes from either Halifax or Yarmouth along the South Shore, you'll find our 1000 square mile nature park. From the forest to miles of fresh water rivers and streams connecting the lakes and on to the Atlantic Ocean, to the gold mines, farms and Mi'kmaq camps, Queens County is abundant in pristine natural resources which remain as tokens of a life gone by.

Along the coast of the Atlantic Ocean, lighthouses offer spectacular views of local fishing fleets and many islands. Connecting the rugged rocky shores are hundreds of white sand beaches in a multitude of shapes and sizes. You will find historic ports, over 100 historic homes and sites dated as far back as 1766, Privateer and Gold Rush costumed events and great hospitality. Combined with the natural beauty and intrigue of our area, Queens County offers an undiscovered backdrop ready for your next shoot!

HALIFAX
REGIONAL MUNICIPALITY

Where can mere footsteps take you from the downtown core of a modern city to a village of days gone by?

Where does the rugged beauty of a weathered coastline, romance the quiet charm of a Victorian community?

Where does the untamed wild walk hand in hand with the serenity of a sunset over the bay?

Where sky meets sea and nature meets city......

P - PROVINCIAL

Nova Scotia Museum locations are always in demand for filmmaking. The Nova Scotia Museum will make its collection and facilities available for film and video production in recognition of the potential educational and economic benefits to the province. In so doing, it will ensure that the security of the collections is not threatened and that usual public access to the collections and programs of the Museum are not unduly disrupted. Film and video producers wishing to use any of the provincially owned Nova Scotia Museum sites first must contact the Cultural Affairs Division.

Canada's National Parks and National Historic Sites

WAITING TO BE DISCOVERED!

Nova Scotia's National Parks offer spectacular scenery - from the calm lakes and tranquil forests of Kejimkujik, to the windswept highlands and rugged coastline of Cape Breton Highlands.

Nova Scotia's National Historic Sites are windows to the past: the fur trading post and settlement at Port Royal; the grassy ramparts of Fort Anne; the massive walls, busy warehouses, elegant homes and noisy taverns of the Fortress of Louisbourg; the star-shaped Citadel perched high above the city of Halifax... all brought to life by the activities of 17th, 18th and 19th century costumed soldiers and civilians.
